

Supplier Supports

Ireland Active reached out to our member suppliers for supports for the industry. See below. If you are a member supplier and have resources that may be of use to Ireland Active member facilities please get in touch info@irelandactive.ie. Click company logo for a direct link to the company webpage

Getting gyms back operational after Covid 19 lockdown - Go fit case study

Gyms have been identified as high risk areas for the spread of airborne viruses. The reason for this is the increase respiratory rates of members during work out and the increasing numbers of daily visitors. Gyms are being set strict measures that need to be adhered to in order to open safely. These include increasing air changes and improving the air quality indoors. Learn how GO fit gyms in Spain worked with Camfil to adapt to this challenge. By using Certified HEPA filter air purifiers and the right filtration systems, GO fit have set the framework for what is possible for gyms.

Detection of SARS-CoV-2 in Swabs from Environmental Surfaces

The SARS-CoV-2 is a recently discovered coronavirus, which has caused the pandemic COVID-19 outbreak. Due to the virus' potential for a prolonged tenacity on surfaces, transmission through contaminated surfaces is being investigated as a possible route of exposure.

Environmental investigations using swabs and testing contribute to increased confidence around the efficacy of cleaning regimes as well as general hygiene levels.

Eurofins offers these tests to help monitor the presence of SARS-CoV-2 in your environment. We will provide you swabs which will help to test, monitor and strengthen the effectiveness of measures put in place in your environment.

Detection of SARS-CoV-2 Technical Details

SARS-CoV-2 test screens for the envelope gene (E-gene) present in a broad range of SARS- and SARS-related coronaviruses. The SARS-CoV-2 Ident test is a one-step real-time RT-PCR to specifically detect the RNA-dependent RNA polymerase (RdRP-gene) of the SARS-CoV-2 virus according to the workflows published by the WHO.

SARS-CoV-2 Swab Procedure

Eurofins will provide swabs with simple instructions as well as UN 3373 compliant packaging for the safe transporting of samples to our specialist Acton facility for testing.

The swabs should be submitted to the laboratory within 24 hours of sampling and can be transported at ambient temperature. Once in receipt of your samples, the swabs are then analysed in our laboratories and reported electronically within 4 working days.

A variety of environmental surfaces can be tested, using Eurofins swabs in areas such as:

| Impacted area | Potential Swabbing sites |
|-------------------------------|--|
| General work and Office areas | Desks, window sills, door handles and water coolers |
| Communal Employee Areas | Employee canteens, lockers, shared toilets and vending machines. |
| Factory Areas | Food production machinery, central stores and various forms of packaging |
| Medical areas | PPE, devices, equipment, hospital wards and waiting rooms |
| Other areas | Restaurants, care homes, and retail spaces including protective barriers, trolleys, baskets and trolleys |

Please contact us for further information and our technical experts will discuss testing options. For ordering, please use the Eurofins Test code:

00001: Screen for CoV and/or SARS-CoV
00002: Identification of SARS-CoV-2 in swabs by real time PCR

LES MILLS

Following feedback and engagement from our partners in the UK & Ireland. We understand how challenging it must be for your organisation right now with the closure of your facilities and freezing of membership dues. Sudden drops in revenue require difficult decisions to be taken daily and enormous efforts from our leaders and wider teams to battle through.

Since COVID-19 reached the UK & Ireland shores, our team has doubled efforts to help partners tackle the unprecedented challenges facing our industry. Our team has been working tirelessly to provide expertise, high-class content, and agile solutions to support your organisation. This has included:

- Free 60-day access to Les Mills on Demand (LMOD) for you to support your members with a world-class home workout solution to keep them

active and engaged with your facilities.

- Creation of 23 (and counting) new workouts with license-free music for your Instructors to deliver to members via livestream.
- Unlimited access to marketing tools and assets, to engage members and grow your brand.
- Ongoing training and education sessions to upskill your Instructors and customer facing teams.

Scaling up LMOD capacity to support the sudden influx of consumers has added to our financial pressure, but we are stepping up because we want to help, and we have valuable solutions to offer our partners during this tough time. There is, of course, a potential long-term mutual benefit from growth of the user-base, but for us each new user does not become cash-positive for 4 months (due to the 60-day free trial and music licensing costs per user), so this is also placing strain on cash flow.

While our focus remains on immediate solutions to help you through the lockdown, we are also developing tools to support your locations subsequent re-opening. This includes full-service relaunch support, plus tools to combine your physical presence with enhanced digital solutions, so that you can meet shifting consumer expectations and accelerate your growth.

As a valued Les Mills and Ireland Active member, we would like to extend our support to you all during these tough times. Please reach out to Blake Fletcher directly as your UK and Ireland Account Manager. We are serious in our commitment to build (and maintain) a healthy business as your survival is our survival!

Sport Innovations Ireland are pleased to let you know that we are providing you with FREE access to a new Coerver® HomeStudy site which is now live!

The NEW HomeStudy site is split into two sections:

1. Skills - 36 x Skills:
Ball Mastery & 1 v 1 Moves (12 x sets of 3 x skills)
2. Challenges - 10 x Skill Challenges:
Drills & Tests to stimulate players Technically, Physically & Psychologically

The content on the site allows for players to practice on their own and/or with a friend/sibling/grown-up at home (you're never too old to learn new skills ☐)

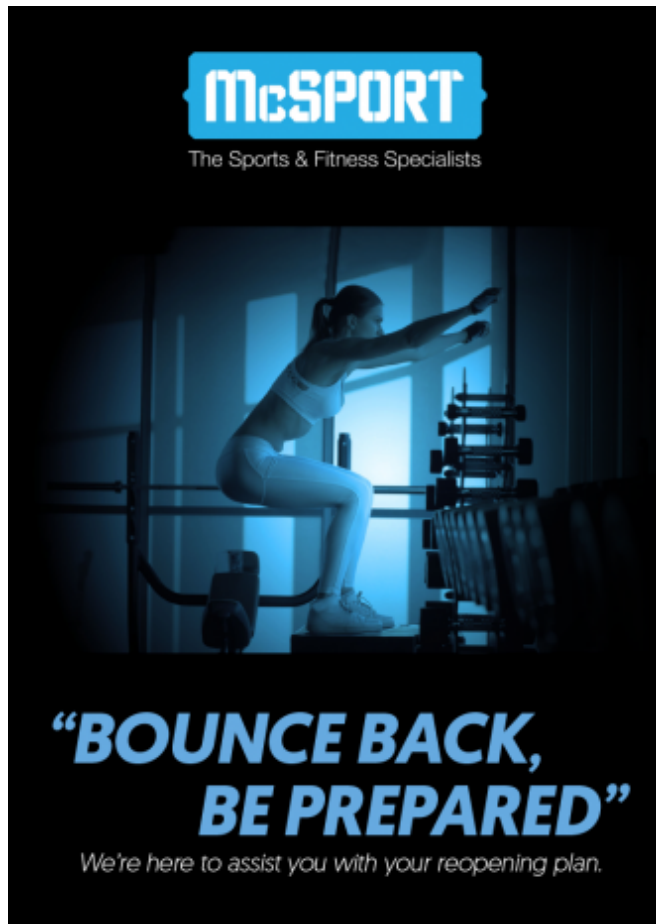

All you have to do to access is register your details below.

Once you've registered, you'll receive a confirmation email with the site link.

“SOS is a full service Contract Cleaning Company and has been in operation for 20 years. We are fully Irish owned and the first Irish Cleaning company to be Carbon Neutral.

SOS was established as a property service company in 2000 and our Its main aim is to identify, specialise and provide a superior service to certain segments of the Property Management and Facilities Management and Leisure market.

We have a wealth of experience in the Irish Property & the Facilities Market together with a strong local management team we are in a strong position to offer a wide range of superior services at competitive rates to the greater Dublin region.

One of our core competencies is our ability to replicate and transfer best practices which we have accumulated over the last number of years of experience. It is the goal of SOS to deliver services of high quality, which meet the overall needs of people in order to secure a clean, safe, healthy, productive, comfortable climate and environment for work and leisure. All our employees and operatives are also fully trained to the standards and techniques required for Covid - 19.

It is our aim to optimise our customers satisfaction by constantly fulfilling or exceeding Expectations. To promote job satisfaction and professional competence for our employees . In order to create an attractive, rewarding and safe working environment. SOS invests in Staff development and training and operates internally according to principles of teamwork and employee empowerment, staff are actively involved in decision making within their own areas of operation and are encouraged to do so.

The corner stone of SOS success is embodied in a threefold commitment, to quality, training and improved productivity. Sustained growth is based on providing trained, skilled staff to carry out cleaning tasks specifically matched to each working environment. In industry, the only constant is change. With SOS it is a change for the better.”

Continuity Readiness: Protecting the Health, Safety & Welfare of our People during Coronavirus

SeaChange has developed COVID-19 Risk Management Solutions that focus on ensuring effective business continuity, recovery and re-opening. Known as 'Ready, Steady, Go' their comprehensive programme of solutions covers all aspects of Health, Safety & Welfare at Work requirements, and elements can be

implemented singly or as a package, depending on the stage of the 'business continuity journey' that you are on. SeaChange will carry out a COVID-19 H&S Risk Assessment/ Gaps Analysis to help you clarify your needs.

SeaChange 'Ready, Steady, Go' Solutions include:

1. Site Recovery & Re-opening Support

Manage ongoing COVID-19 risk, reduce exposure to increase staff and customer confidence and strengthen recovery and re-opening efforts.

**Access more detailed information on this solution [here](#)*

1. Risk Assessment/ Gaps Analysis

Find out how prepared you are to operate safely through COVID-19; are the measures you are taking robust enough or are they excessive? Do you need to do more or less?

**Access more detailed information on this solution [here](#)*

1. COVID-19 Frontline Staff E-Training

Inform and upskill your frontline staff on the risks and associated controls for COVID-19 via our online training in topics such as *Frontline Safety; PPE Use; Infection Control; Customer Safety; Site Security; Safety Behaviours* etc.

**Access more detailed information on this solution [here](#)*

1. COVID-19 Routine Cleaning Checks available in our CAYGO® Digital Solution

This digital Housekeeping App is designed to ensure thorough cleaning is routinely completed, recorded and reported on to limit the exposure to infection.

**Access more detailed information on this solution [here](#)*

1. Rapid Response Programme

You will potentially have a suspected or confirmed case of COVID-19 in your Business. Prepare for this now so that you are ready if/ when the time comes, and you can recover quickly.

**Access more detailed information on this solution [here](#)*

1. Remote/ Onsite Consultancy & Training

The SeaChange team of experts are well-placed to support you with your individual site requirements. We can address your more complex safety concerns, problems and issues, from managing behaviours to reorganising systems, we will be happy to help.

**Access more detailed information on this solution [here](#)*

1. COVID-19 Safety & Risk Management Signage

A visual communication plan is essential as part of the risk assessment process; incorporating safety signage, social distancing markers and other visual cues to ensure staff and customer safety awareness and safety behaviour compliance.

**Access more detailed information on this solution [here](#)*

Contact SeaChange:

You can find out more about each SeaChange Solution by contacting Andrew on 085 861 9499 or andrew.oconnor@seachange-intl.com

We hope this proves to be a helpful resource over the coming days/weeks ahead and we can't wait to see you in action! If you fancy showcasing your skills and hard work to the world, make sure to tag us in on your post and we'll share! Use @coervercoachingireland #CoerverHomeStudy

Aqualine have a number of products to ensure the safety of your staff & customers for the reopening of your leisure centre.

PPE Full Finger Gym Gloves & Face Masks

Range of PPE wear for both your staff & customers. Full finger fitness gloves for customers to wear at all times to stop the spread of COVID-19.
